

Junior Water Quality Specialist

Matrix Solutions is a full-service environmental consulting company with multi-disciplinary teams of engineers, scientists and technologists. Our traditional services include site assessments, investigations, monitoring and remediation of contaminated groundwater and soils. Matrix also provides expertise in environmental impact assessments and audits, surface water management and protection, fisheries assessments, water quality evaluations, public consultation, GIS and environmental management systems.

Our Calgary office seeks a junior Water Quality Specialist to join our growing Aquatics team.

The Water Quality Specialist will be part of an integrated Fisheries and Water Quality team. Responsibilities will include: collecting, handling, tracking water quality samples as well as assisting with the analysis of results; and assisting with aquatic habitat assessments, fish assessments, stream crossing (QAES) assessments, and lake and river surveys (including bathymetry). This position largely involves field work but also includes office duties including data analysis and writing.

Applicants must have a bachelor's degree in biology, chemistry, environmental science or related field and 0-2 years of experience. Candidates must be able to pay attention to detail, have strong communication skills (verbal and writing), be physically able to meet the demands of field work; and have a class 5 driver's license.

Matrix Solutions offers a comprehensive compensation package that includes an employee share-ownership program, profit share, employer RSP contributions, and an education fund.

But, that's only a piece of what it means to work here!

We are also committed to flexible work hours and schedules, team-based work, cross-training opportunities, and rewarding our star performers.

If you believe this position is a fit for you, please submit your resume through our career portal at www.matrix-solutions.com.
