

## Association of the Chemical Profession of Alberta

### The ACPA Undergraduate Scholarship in Chemistry Award Criteria 2010

The ACPA Undergraduate Scholarship in Chemistry, in the amount of \$1000, is awarded annually to a deserving student who is registered in a full time undergraduate chemistry program at a university in the province of Alberta. The scholarship award criteria are described below:

#### 1. Academic Excellence (50 points)

The recipient must have achieved an average GPA of at least 3.0 on the 4-point scale (or equivalent) based on the eight best one-semester undergraduate level chemistry courses within the current course of studies. An original transcript must be submitted with the application for the scholarship.

#### 2. Service to the Chemical Profession (50 points)

The recipient must have contributed to the chemical profession by volunteering in a chemistry-related activity. Eligible volunteer activities include National Chemistry Week, science fairs, chemistry mentoring, and boards or committees of chemistry organizations such as the ACPA or the CIC. Points will also be awarded for student memberships in ACPA, CIC or undergraduate chemistry student associations.

The applicant must submit a letter, 100 to 200 words in length, that describes the applicant's activities related to service to the chemical profession and memberships in chemistry organizations. Diversity of participation and service will be considered in the selection process, and leadership will be rated more highly than simple participation.

Copies of certificates, diplomas, awards, reference letters or other documents that substantiate the activities described in the letter should be provided (if available). Names and telephone numbers of people who can verify the applicant's activities should be listed following the letter.

All information, including the required transcripts, letter and supporting documentation must be received by the ACPA at the following address no later than **March 31**.
