

Executive Director - Alberta Radiopharmaceutical Center

Requisition #: ALB00024947

Location: Edmonton, Alberta

Job Type: Regular Full Time

Salary: \$57.88 - \$104.19 per hour

Your Opportunity:

Alberta Health Services (AHS) is seeking an experienced, driven and methodical individual for the role of Executive Director - Alberta Radiopharmaceutical Service. This is a key leadership role within the Diagnostic Imaging Leadership Team and is accountable for all manufacturing, technical, scientific and business operations of Alberta Radiopharmaceutical Services (ARS). As the Executive Director, Alberta Radiopharmaceutical Services, you will influence the research and development of radiopharmaceutical diagnostic and treatment methodologies that are intended to lead to new standards of care and improved patient outcomes. The Executive Director will collaborate and consult with internal and external stakeholders, proposing and advising on transformative methods and strategies to address future business needs and imminent challenges related to the delivery of patient care, including being accountable for the actions of all staff that are involved in the preparation, production and quality assurance of radiopharmaceuticals for distribution locally, provincially and Canada wide.

Description:

As the Executive Director - Alberta Radiopharmaceutical services, you will be responsible and accountable in the development, implementation and management of ARS, with significant, province-wide impact. The Executive Director holds accountability for the overall direction, performance and results achieved by the program area, while ensuring overall compliance with regulatory body requirements. You will develop, implement, and evaluate short-term and long-term strategies including pricing of products, process development, quality assurance, research and development associated with clinical and preclinical radiopharmaceuticals in alignment with AHS priorities, values and organizational goals. A key success to this role will be building, nurturing and facilitating collaborative relationships necessary for effective and long-term engagement with diverse internal and external stakeholders and vendors, including a substantial and comprehensive team of leaders across the entire organization. The Executive Director will collaborate with other internal functional groups for seamless operation, consistency and quality customer support; as well will be responsible for a multi-faceted budget in a complex and changing environment, planning and implementing a cost-effective operational service delivery model, including budget related to the purchase of radiopharmaceutical products and services.

Qualifications:

- PhD in Chemistry/Radiochemistry with a Post Graduate certificate training in Radiopharmaceutical Chemistry/Radiopharmacy.

- Minimum three years of experience in Radiopharmaceutical operations encompassing manufacturing, compounding, quality control and distribution of radiopharmaceuticals.
- Business Administration Degree or equivalent experience is preferred.
- Eligible for an academic appointment with University of Alberta or University of Calgary preferred.
- Knowledge and understanding of Federal/Provincial regulations governing radiopharmaceutical operations including Goods Manufacturing Practice (GMP).
- Member of Canadian College of Radiopharmaceuticals, European Association of Nuclear Medicine and Association of the Chemical Profession of Alberta.
- Experience working within a complex, public sector organization or organization of significant size, complexity, or diversity.
- Strong leadership skills and a demonstrated comfort with decision-making responsibilities.
- Strong relationship-building skills and the ability to forge effective working partnerships with internal and external partners, including senior leadership within AHS, and other organizations.
- Proven ability to develop and implement strategic plans, with effective organizational and change management skills.
